## **DETAILED ACTION**

### ***Response to Amendment***

1. This is in response to amendment received on 04/18/05. Claim 1 was amended along with the figures.

### ***Specification***

2. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: "resiliently flexible material", "u-shaped profile", "sundry hat", "...element providing means for curvilinear compression along the periphery of the hat brims", "display surface of the element being gusseted and shaped topside providing means for continual uniform fit to the hat brim" and "said element being suitable for the application and displaying of indicia, text, colors and the like" from claim 1 is not found in the specification.

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Grundy (US 2002/0042941).

In regard to claim 1, Grundy teaches a protective element display element (6) which is attached to the edge of a standard ball style hat (4) brim (14). The protective element (6) is constructed and designed of a flexible material having a u-shaped configuration based upon the shape of the hat brim the element is attached to (paragraph 0011). The protective element (6) being suitable for the application and displaying of indicia (20), text colors and the like (paragraphs 23-29). The element providing means for curvilinear compression along the periphery of the hat brim (figure 2). The display surface of the element being gusseted and shaped topside providing means for continual uniform fit to the hat brim (figure 2). continual uniform fit to the hat brim (figure 2).

### ***Response to Arguments***

5. Applicant's arguments filed 04/18/05 have been fully considered but they are not persuasive.

There does not appear to be any patentable difference between Applicant's disclosed invention and that of Grundy (US 2002/0042941). The decorative element of Grundy is capable of extending the entire length of the brim (paragraph 0011), which would inherently give the decorative element a u-shaped configuration. Further, the decorative element of Grundy provides support means for the hat brim to retain it's original shape and reduce deformation of the brim (paragraph 0012).

### ***Conclusion***

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
